water and lighting.

Estimated energy needed in this property is:

• 44,034 kWh per year for heating

• 3,386 kWh per year for hot water

water and lighting in this property. These costs usually make up the majority of your energy bills.

This property had **no smart meters** when it was assessed.

Heating this property

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

These ratings are based on assumptions about average occupancy and

energy use. People living at the property may use different amounts of
